

## 12V OIL PUMP

### KB10236

- Work by connecting to a 12 V battery with clamps
- Suction using a suitable suction hose

The pump enables quick and easy oil change. It is equipped with crocodile clips for a 12V battery. It has a practical switch located on the pump.

Set contains:

- 12V pump with a power cord with crocodile clips
- 2 hoses for sucked oil
- 2 metal clamps

The pump is used to pump: Diesel oil, Engine oil, Fuel oil

Specification: Powered by strong, solid crocodile clips that are connected to a 12V battery.  
Capacity: Diesel, fuel oil: approximately 1.5l/min

Engine oil (40-60 degrees C): approximately 0.2l/min.

Oil outlet pipe: 1.5m, diameter: 12mm

Oil inlet pipe: 1.2m, diameter: 6mm

Rated Power: 60-80W

Attention! The pump is lubricated by the liquid it pumps! The pump must not be used for liquids other than those listed below. You cannot pump water, gasoline, paraffin, etc. with it. The pump should not run for longer than 30 minutes
